

IMPROVE YOUR TIME-TO-MARKET FOR BUSINESS INTELLIGENCE (BI) IMPLEMENTATIONS WITH PENTAHO'S BI SUITE

Project Leadership Associates (PLA) provides comprehensive technical expertise to drive the successful delivery of critical BI applications on the Pentaho platform. Pentaho's open source BI Suite provides a full spectrum of business intelligence capabilities, including data integration, query and reporting, interactive analysis, dashboards, and data mining. As a leading Pentaho integration partner, PLA couples deep training with real-world project experience to deliver maximum value while minimizing risk for your Pentaho deployment.

PLA's certified consultants will work closely with your team to get your Pentaho implementation up and running quickly and smoothly. Our Pentaho-related service offerings provide a best practice approach for deploying and maintaining a BI solution for use by a single department, across your enterprise, or for key external stakeholders.

SERVICE OFFERINGS

- » **72 hour challenge:** an accelerated project where the full BI suite is used to bring your data to life.
- » **Proof of Concept (POC):** short duration project where a Pentaho solution is deployed within your organization.
- » **BI Roadmap:** PLA works with your organization to lay out the foundation to achieve your Business Intelligence vision.
- » **Data Warehouse:** comprehensive services around the implementation of a Pentaho-based Data Warehouse solution.
- » **Application Maintenance and Support:** free up your existing resources by allowing PLA to serve as your on-call, part-time Pentaho expert.
- » **Training:** PLA offers on-site training programs for your project team members. Training can be customized to fit your needs and includes a combination of lecture and hands-on labs.

BENEFITS

- » Decrease implementation time by leveraging PLA's knowledge and experience.
- » Lower your risk by having certified professionals assist with your implementation.
- » Gain valuable insight into the required path to achieve your Business Intelligence goals.
- » Free up existing staff to focus on other IT initiatives.
