

MICROSOFT LYNC ON-DEMAND MANAGED CLOUD SERVICES

 Microsoft®
Lync™ Server 2010

Microsoft Lync ushers in a new connected experience transforming every communication into an interaction that is more collaborative, engaging and accessible from anywhere. A single interface unites voice, IM, audio, video, and web-conferencing into a richer, more contextual offering. This includes a visually compelling experience that is consistent throughout Microsoft Office and other business applications, including color-coded presence icons, pictures, high-resolution video and desktop sharing. End-users can instantly see the availability of their contacts, start a conference call from within Office applications, or sit down for a “face-to-face” video-conference.

Lync On-Demand provides PLA customers with the rich collaborative functionality of the Microsoft Unified Communications solutions at a fixed monthly operating cost that is fully managed by experienced PLA architects and engineers. Lync On-Demand allows customers to leverage these solutions, without upfront hardware and implementation costs that are often a barrier to implementation. Lync On-Demand provides a 99.99% service level agreement for the Microsoft Lync solutions.

Lync On-Demand is provided at a fixed per user monthly fee, based on the features and functionality that your organization would like to provide to your employees. In addition, peripheral equipment like handsets, headsets and video equipment can also be included for an additional fixed monthly cost.

Contact us today for a free assessment and custom Lync On-Demand quote.
