

APPLICATION SOLUTIONS

Enhance management, delivery, customization and integration of all your desktop applications.

PLA helps businesses centrally manage and deliver customized and integrated Microsoft applications across the entire enterprise. Keeping pace with ever changing computing environments, reduced support for older operating systems and applications, and elevated security threats is becoming more challenging by the day. But with PLA's Application Solutions, you have an experienced Microsoft Gold Certified partner that is also part of a select inner circle of service providers who get a first look at new software upgrades and developments. This ensures that our clients always stay ahead of the curve on important developments.

Our team will work with you to drive standardization across multiple platforms, limit redundancies, reduce delays related to manual processes, and make sure customizations translate across upgrades. Our goal is to attain maximum efficiency across every level of your desktop computing environment and that translates to better administrative oversight, reduced operational effort and improved system performance throughout your entire organization.

Services

APPLICATION SOLUTIONS

STRATEGY & EXECUTION

To help fill the gap that often exists between a company's strategy and what actually happens day-to-day, you need a comprehensive plan that allows for seamless execution to turn a company's vision into reality.

BUSINESS OPERATIONS

The better your organization is able to combine best-in-class and enterprise wide strategies, processes and technologies with highly qualified and trained people; the more effective you will be able to operate.

APPLICATIONS

Making the right application choice is just the beginning because the full value of any software tool can only be derived through effective implementation, management and customization to meet your specific business needs.

INFRASTRUCTURE

Maintaining a robust and unshakeable technology infrastructure is an important backbone of every business organization. Equally as important is making sure that this infrastructure is effectively optimized for peak performance, management and security.

Project Leadership Associates

PLA is a business and technology consulting firm that empowers small, middle-market and enterprise organizations with services across four core solution groups: 1.) Strategy & Execution; 2.) Business Operations; 3.) Applications and 4.) Infrastructure. We focus on delivering all of our services with industry leading thought-leadership, seasoned senior consultants and strong business understanding. We are proud of our organizations accomplishments, but even more proud of our clients success.

Our people are passionate about the strategy and technology solutions they develop, the success of the projects on which they work, and the clients with whom they work. We work hard to develop customer relationships built upon mutual respect and innovation, while emphasizing businesses and technical excellence in everything we do, so each project delivers maximized value and return to the client.

PLA has been consistently ranked among *Crain's Chicago Businesses'* Fast 50 and Everything Channel's CRN Fast Growth 100 List as an annual recognition of our growth, performance and for maintaining profitability since its founding in 1998. PLA was also recently honored with the *Microsoft Central Region FY08 Partner Award for Marketing Excellence* due to our success in driving Microsoft Unified Communications solutions in the marketplace.

With headquarters in Chicago and branch offices in Houston, PLA is uniquely poised to offer a broad array of solutions that work collaboratively with clients to help them realize substantial results. If you are interested in learning more about how we can help you with your business and technology needs, please explore our Web site at www.projectleadership.net or contact Douglas Klatt at 312-441-0077.
